# STWARS MURRIETA

Pentester & Red Team Operator

Madrid / Remote / Hybrid | Immediate availability | stwarsmurrieta02@gmail.com |
linkedin.com/in/stwarsmurrieta | ricepattyjulls.github.io

## PROFESSIONAL SUMMARY

Pentester and Red Team Operator focused on offensive security, identity security, cloud security, and web application security. Hands-on experience across Active Directory, Microsoft Entra ID, Azure, and web applications, with emphasis on identity-based attack paths, access control, privilege escalation, authentication and authorization flaws, and technical vulnerability validation. Combines manual testing, Burp Suite Professional, PowerShell/Bash automation, and remediation-oriented reporting to produce clear, reproducible evidence and practical risk narratives.

## CORE COMPETENCIES

- Active Directory security, Kerberos, ACL/DACL analysis, delegations, trusts, BloodHound, and privilege escalation.
- Microsoft Entra ID, Azure RBAC, Microsoft Graph, OAuth/OIDC, tokens, Conditional Access, Key Vault, PIM, App Registrations, and Enterprise Applications.
- Web and API security testing covering reconnaissance, authentication, authorization, IDOR, access control, business logic, and OWASP Top 10 validation.
- Offensive tooling and automation with PowerShell, Bash, Burp Suite Professional, ffuf, sqlmap, nuclei, LDAP/ADSI, and technical reporting workflows.
- Technical impact documentation, remediation proposals, evidence organization, and retesting support.

Tooling & Languages: PowerShell, Bash, Burp Suite Professional, BloodHound, PowerView, LDAP/ADSI, ffuf, sqlmap, nuclei, Microsoft Graph, Azure CLI/PowerShell, Python basics.

## PROFESSIONAL EXPERIENCE

### Identity Security Consultant / Penetration Tester

*Kong Security Consulting | Feb 2025 - Present*

Role focused on offensive security assessments across Active Directory, Microsoft Entra ID, Azure, and web applications, combining identity security, cloud security, authorized web hacking, automation, and remediation-oriented technical reporting.

- Performed attack path analysis and privilege escalation assessments in Microsoft environments.
- Assessed Active Directory configurations, Kerberos, ACLs, delegations, trust relationships, and hybrid identity exposure.
- Analyzed exposures in Entra ID, OAuth/OIDC, Conditional Access, App Registrations, Enterprise Applications, Microsoft Graph, and Azure RBAC.
- Performed authorized web and API security testing covering reconnaissance, authentication, authorization, access control, business logic, IDOR, and vulnerability validation.
- Used Burp Suite Professional and manual validation to confirm findings, reduce false positives, and document reproducible technical evidence.
- Developed PowerShell and Bash tooling for enumeration, triage, and support during security assessments.
- Prepared technical reports with findings, impact analysis, evidence, traceability, and remediation recommendations.

### IT Support / Cybersecurity Documentation Assistant

*IDAT | Mar 2024 - Dec 2024*

Role combining technical support and cybersecurity-related documentation, with a focus on organizing procedures, attack scenarios, and technical evidence.

- Documented attack scenarios, technical procedures, and security activities performed in controlled environments.
- Supported the organization of evidence, technical notes, and reports related to security testing.
- Collaborated on technical support, incident resolution, and operational assistance for users.

## RESEARCH AND PROJECTS

### Offensive Security in Azure / Entra ID

*Independent Research | Jan 2026 - Present*

Hands-on research into cloud and hybrid identity attack paths.

- Analyzed OAuth tokens, Azure RBAC, Microsoft Graph, Conditional Access, Key Vault, Logic Apps, and cross-tenant relationships.
- Documented attack chains, evidence, technical impact, and mitigations for corporate environments.

## CERTIFICATIONS

- Red Team: CRTO - Certified Red Team Operator; CRTM - Certified Red Team Master; CARTE - Certified Azure Red Team Expert.
- Cloud Security: AZ-500 - Microsoft Azure Security Engineer Associate, in progress.

## TARGET ROLES

Pentester | Red Team Operator | Identity Security Consultant | Cloud Security Consultant | Web Security / API Security
